Data Sheet

M-tec GIGA-Mix

The GIGA mixer is designed to process dry mortar products with a granularity of up to 8 mm and is found on numerous building sites throughout the world. It has been optimized for processing floor screed, brick-laying mortar or ready-mixed concrete in large volumes. It features particularly impressive mixing power, something that is required above all for the blending of industrial concrete in a wide variety of qualities. It is now frequently used in large-scale repairs on bridge structures with synthetic modified dry mortars and concretes.

Technical Data

Standard Coverying Volume	- approx. 130 l/min (depending on the transport and mixing shaft)
Driver Motor	- 9,0 kW, 400 V, 50 Hz
Connecting Cable	- 5 x 4 mm²
Connector	- 32A, 5p, 6h
Water Supply	- 3/4“ water hose with GEKA coupling, required water pressure/min. 2.5 bar while the machine is running
Electrical Connection	- 400 V, 50 Hz, 3 ph
Fuse	- 32A

Approximate Overall Dimensions and Weight

Length	3400mm
Width	700mm
Height	800mm
Weight	590kg
