

## GM100H GROUT MIXER

### GM100H Hand operated grout mixer

The GM100H hand operated grout mixer uses heavy duty, case hardened bevel edge gears to ensure long life expectancy. These are serviced by easily accessible grease nipples. Generous phosphor bronze shaft bearings insure that this grout mixer continues to operate reliably in even the harshest of site conditions. The mixing drum is reinforced with steel bands and incorporates a bag support to assist loading of materials. Extremely efficient paddles and baffle plates inside the drum to allow for quick and thorough grout mixing. The GM100H is easily transportable around site due to it having robust 200mm wheels.

### Technical details

Mixing Capacity - 90 Litres

Dimensions - 950mm x 980mm x 620mm

(H x W x D)

Weight - 78 kg
