## D30

### m-tec D30 Continuous Mixer

Mixer D30 is our robust all-rounder for processing dry mortar products with a granularity of up to 6 mm. It is found on numerous building sites throughout the world and rationalizes tasks such as bricklaying and the processing of fine concrete or screeds.

The D30 is designed for mobility and ease of transport and features tried-and-tested m-tec technology. Fitted with a powerful 4,0 kW motor, it mixes even heavy products with ease.

The D30 is fed with bagged material as standard. The large material container guarantees professional working conditions. The optional filter cap means that the D30 can be fed by a conveyor system with ideal results.

The clear layout of the controls and the conscious avoidance of superfluous switches mean that the system is extremely intuitive. As is typical of all m-tec systems, the D30 has easy and quick to use connector systems that enable important elements, such as the mixing chamber or mixer motor, to be replaced in just a few seconds.

- **Delivery volume:**  
standard approx. 30 l/min (depending on the transport and mixing shaft)
- **Drive motor:** 4.0 kW, 400 V, 50 Hz
- **Weight**  
220kg
- **Dimensions**  
197 x 69 x 108 cm

**Lawn Road Industrial Estate, Carlton in Lindrick,  
Worksop, Notts, S81 9LB. England.**
