

MR-450

The MR-450 is one of the most versatile Refractory concrete repair pumps manufactured by Allentown. It's ideal for Wet Process Shotcrete in Refractory sprayed concrete applications. The MR-450 has a powerful 30 hp (22kW) electric motor and conveys low slump Refractory concrete and packaged highperformance materials over long distances. The MR-450 also features its unique 3-inch swingtube, which cycles in one-tenth of a second to provide smooth flow into the pipeline. This machine's hopper design insures excellent cylinder fillage and is very easy to clean out through a bottom drop door. The MR-450 is now supplied with the Lincoln Quicklub Automatic Greasing system as standard.

- Output 2 3 tonnes/hr
- Maximum material pressure 1,750 psi
- 30hp (22kW)
 3/60/460, TEFC
 electric motor with
 1.15 SF and acrossthe-line motor

Weight: 1451kg

Dimensions: 178 x 335 x 135 cm
