

## **MX-10**

The MX-10 is our ultra high-pressure 3-inch swing tube mixer/pump designed for dense refractory shotcrete and pump cast applications. Since 1996, this machine has become the industry standard for monolithic refractory installations. Our high torque pan mixer combined with our ultra high pressure piston pump can consistently deliver 10 tons per hour. This machine is commonly used to pump refractory materials in excess of 300 ft. vertical during the most demanding refractory installations. Our swing out receiving hopper allows easy access to the lower hopper for cleaning and maintenance and the lower hopper is equipped with forklift tubing for easy flat pack removal.

- 2200 PSI Piston Face Pressure
- 2200lb Capacity High Torque Pan Mixer
- Fill Rite Water Meter
- 20 ga. Dousing Bucket for Fast Water Introduction

Weight: 4082kg

**Dimensions:** 518 x 223.5 x 297 cm

Lawn Road Industrial Estate, Carlton in Lindrick, Worksop, Notts, S81 9LB. England.
