

## Hyundai 5.5kW / 6.8kVa\* Recoil and Electric Start Site Petrol Generator | HY7000LEK-2

- Ideal petrol generator for site use, commercial use, tradesmen or simply home/garage use.
- Wheeled generator with powerful Hyundai 389cc / 13hp 4-Stroke engine and superior quality Hyundai AVR alternator.
- AVR (Automatic Voltage Regulator) - keeps output stable, within +/- 3% of 230V. This ensures it is suitable to power sensitive equipment.
- Portable and with electric start, ensuring easy power generation where you need it at the turn of a key.
- Improved muffler design including a spark arrestor. This reduces noise levels and makes the unit more environmentally friendly compared to traditionally designed generators.
- Low oil alert shuts down the engine automatically when oil runs low, this prevents irreversible damage to the engine.
- Built in circuit breaker which cuts off power when overloaded.
- Easily portable thanks to the integrated wheels

### Technical Data:

Gross Weight (kg) - 94.00

Warranty - 1 Year for commercial use

Engine Type - HY390 4 Stroke 13 HP Electric Start Petrol

Power Output (hp) - 13.00

Number of Cylinders - 1.00

Displacement (cc) - 389.00

Cooling Method - Air

Speed (rpm) - 3000.00

Max kVA - 6.80

Max kW - 5.50

Voltages - VAC - 2x 115v 16a, 1x 230v 32a

Starting Method(s) - Easy Electric Key Start, with Back-up Recoil Start

Fuel Tank (L) - 25.00

Noise Level db (A) @ 7m - 65.00

Wheel Kit? - Yes (Included)

### Approximate Overall Dimensions and Weight

Length	700 mm
Width	650 mm
Height	655 mm
Weight	94 kg
