

## MALTECH MINIPLASTER

### Data Sheet:

Plastering machine for renovation areas, small construction sites and processing of fine plaster. Efficient rehab and renovating: with the Miniplaster construction machine it is possible to process mortar, plaster, gypsum and glue, as well as filler material and pre-mixed mortar and plaster. The machine is of multiple uses, and with its small dimensions a valuable support on any construction site. It is easy to dismount, thus making the transport from and to the building site a walk in the park!

#### Innovation:

Single phase operation 230 V 2.2 kW, easy to dismount and transport

#### Features:

For indoor and outdoor works  
Processing glue as well as insulating plaster, indoor and outdoor plaster  
Light-weight, easy to assemble and dismount  
High-quality components  
Single phase operation 230 V – 2.2 kW with frequency inverter for increased power in single phase mode

#### Technical Data:

Conveying capacity\* approx. 8-12 l/min (293 rpm)  
Max range\* approx. 10 m  
Gear motor 2.2 kW  
Compressor capacity approx. 130 l/min  
Transport pressure 20 bar  
Min water pressure 3 bar  
Electrical drive 42 V

Width 600 mm  
Length 870 mm  
Height 1380 mm  
Height of opening 900 mm  
Total weight 120 kg

#### Standard Equipment and Accessories:

Screw pump set B4-2L  
Mortar hose DN25, 10 m, 40 bar  
Air hose ½ " 10 m  
Spray gun DN25  
Tool kit

\*Approximate values that may vary according to type and consistency of the material in use.
